Mastering the Art of Backend Brilliance

West Java, Indonesia

Summary

I am a server-side systems architect with a strong focus on designing, building, and refining robust backend solutions that power modern applications. My expertise lies in developing scalable and maintainable APIs, ensuring seamless integration between services, and enabling reliable data exchange across distributed systems. I approach backend development with a deep understanding of system design principles, allowing me to create architectures that are efficient, secure, and adaptable to future growth.

Performance optimization is a core aspect of my work. I consistently analyze bottlenecks, optimize database interactions, and fine-tune application logic to ensure high availability and responsiveness, even under heavy workloads. I am highly attentive to data structures, communication protocols, and error-handling strategies to ensure system reliability and consistency.

I primarily work with Go and PHP, leveraging each language's strengths to build high-performance services and stable business logic. My technical skill set is complemented by a collaborative mindset—I work closely with frontend developers, product teams, and other stakeholders to translate business requirements into clean, effective backend solutions. Clear documentation, well-defined interfaces, and shared standards are central to my development process.

Driven by problem-solving, I enjoy tackling complex technical challenges and transforming them into elegant, practical solutions. I continuously refine my skills and stay aligned with best practices to deliver backend systems that are not only functional but also resilient, scalable, and easy to maintain over time.

Experience

PT Zahir Internasional

Back End Developer

October 2021 - Present (4 years 3 months)

- Develop efficient and reliable backend systems
- Design and build robust databases to support system operations
- Improve system performance and reduce response time in data processing
- Implement data security principles to protect confidential information
- Enhance backend efficiency and scalability through regular updates and maintenance

Kementerian Perencanaan Pembangunan Nasional Republik Indonesia/Bappenas RI

Web Programmer

July 2023 - December 2023 (6 months)

Jakarta Raya, Indonesia

- Maintained and developed new features for PraDa (Profil dan Analisis Daerah) Bappenas web application.
- Implemented enhancements that improved functionality and overall user experience.
- Collaborated with cross-functional teams to troubleshoot and resolve technical issues.
- Designed and executed A/B testing strategies to optimize design and boost conversion rates.
- Led the migration to a new Content Management System (CMS), resulting in faster performance and increased user satisfaction.
- Earned recognition from clients, supervisors, and colleagues for innovative ideas and effective problem-solving.

Alus Technology

Web Developer

October 2015 - September 2021 (6 years)

ciomas, indonesia

- Building PHP websites using PHP based frameworks.
 - Testing and validating work produced as part of the development process.
 - Developing advanced database driven websites & systems.
 - Back end development and maintenance of websites using PHP and MySQL.
- Developing compatible User Interface functionality using jQuery & other libraries.
- Developing web sites using MySQL, PHP & other programming tools.
- Working in a data analyst role and with business intelligence applications.

- Documenting features, technical specifications & infrastructure requirements.
- Working with a multi-disciplinary team to convert business needs into technical specifications.

B A P P E N A S (Indonesian Ministry of National Development Planning)

Programmer

January 2017 - December 2020 (4 years)

Greater Jakarta Area, Indonesia

- Developed an application to support the smooth implementation of E-Musrenbang 2017.
- Ensured application stability by minimizing bugs and optimizing performance.
- Processed and managed data generated from Musrenbang activities, ensuring accuracy and usability.
- Built the Bappenas Single Sign-On (SSO) application, improving accessibility and security across systems.

Education

Universitas Indraprasta PGRI (UNINDRA)

Bachelor's degree, Teknik Informatika · (2015 - 2019)

SMKN 1 CIBINONG

12, Computer Software Engineering · (2012 - 2015)
